

# Instructions

When clicking **INCREASE** the box with shall be INCREASED of 100px

When clicking **DECREASE** the box with shall be DECREASED of 100px

# Start code explanation

```
const MAX_SIZE = 800;
const MIN_SIZE = 100;
const STEP = 100;

// FUNCTIONS -----
let decreaseBox = () => {
  // TODO : decrease the box width of STEP (100 px)
  // WARNING : don't do it if the size is already the MIN SIZE
  // TIP : to set the style.width, don't forget to add the "px" at the end
};

let increaseBox = () => {
  // TODO : increase the box width of STEP (100 px)
  // WARNING : don't do it if the size is already the MAX SIZE
  // TIP : to set the style.width, don't forget to add the "px" at the end
};

// MAIN -----
let box = document.querySelector("#box");

// Initialize the size of the box (100 px at the begining)
let currentWidth = MIN_SIZE;
box.style.width = currentWidth + "px";

// Add button functions
let btnDecrease = document.querySelector("#btn-decrease-width");
btnDecrease.addEventListener("click", decreaseBox);

let btnIncrease = document.querySelector("#btn-increase-width");
btnIncrease.addEventListener("click", increaseBox);
```
