

# ACTIVITY 3

Open index.html on **Chrome**

Open the “**Console**” tab of the developer’s tools (Ctrl + shift + I)

**Q1** - Execute each of the following command, try to understand what it does, and explain in the table below.

```
var newH2= document.createElement("h2")
```

```
newH2.textContent = 'hello there !'
```

```
document.getElementById("wrapper").appendChild(newH2)
```

INSTRUCTION	YOUR DEFINITION
<code>document.createElement(name)</code>	It mean we created new element in javascript .
<code>element.appendChild(child)</code>	It mean we want to add element to html.

**Q2** – Try to **apply these instructions** to create new elements (anything you want)

□ **Using the Chrome debug tools** to understand what is happening.
