

Instructions

You need to print

- After number of book : the number of book in the list of book
- After book titles : the list of book titles, separated by comma

WARNING

You need to get those information
From the DOM !!
(don't write directly "4" ...)

The screenshot shows a web application interface. At the top, there is a text input field labeled "Add a book..." and a blue button labeled "+ Add". Below this is a section titled "Books to read" which contains a list of four books: "TomTeav", "Cambodia History", "AngkorWat", and "Name of the Wind". Each book title is preceded by a vertical orange line and followed by a red "delete" button. Below the list is a section titled "Summary". Under "Summary", there are two labels: "Number of books:" and "Book titles:". The value "4" is entered in the input field for "Number of books:", and the text "TomTeav, Cambodia History, AngkorWat, Name of the Wind," is entered in the input field for "Book titles:". Two red arrows point to these input fields from the left.

Add a book... + Add

Books to read

TomTeav	delete
Cambodia History	delete
AngkorWat	delete
Name of the Wind	delete

Summary

Number of books:

4

Book titles:

TomTeav, Cambodia History, AngkorWat, Name of the Wind,
